ORO PRIME-PREMIUM

White high-grade cotton buffs stitched (6*50 X 50 Ply)

Made by ultra-high density feather fabric, tight and soft use with high finishing. Made of soft cotton flannel.

Diameter : 6" | Ply : 50 | Stitching : 3 rows

AURA-PREMIUM

The OFF WHITE muslin buffs is relatively soft and can be used with a wax compound with a higher particle size for the pre-polishing process of platinum gold and silver. It can also be used with a lower grain wax compound for the final polishing process of platinum, gold and silver to achieve a mirror effect.

Used for fine polishing processes and mirror finishing processes.

Available Sizes L 6" x 50 Ply.

ORO ELITE BUFF

Can be used with all kinds of wax compound, The ultra-high shining of polished surface, For the polishing process and the final mirror finishing.

OTHER SIZES ALSO AVAILABLE :

3 X 30 | 3 X 35 | 3 X 40 | 3 X 50
4 X 30 | 4 X 35 | 4 X 40 | 4 X 50
5 X 30 | 5 X 40 | 5 X 45 | 5 X 50
5 X 60 | 6 X 30 | 6 X 50

YELLOW MUSLIN BUFFS

6 *50 X 50 Ply has a thick fabric, high hardness, durability and persistence can remove scratches on the surface of the product.

Diameter : 6" | Ply : 50 | Stitching : 3 rows

OTHER SIZES ALSO AVAILABLE

3 X 30 | 3 X 35 | 3 X 40 | 3 X 50
4 X 30 | 4 X 35 | 4 X 40 | 4 X 50
5 X 30 | 5 X 40 | 5 X 45 | 5 X 50
5 X 60 | 6 X 30 | 6 X 50

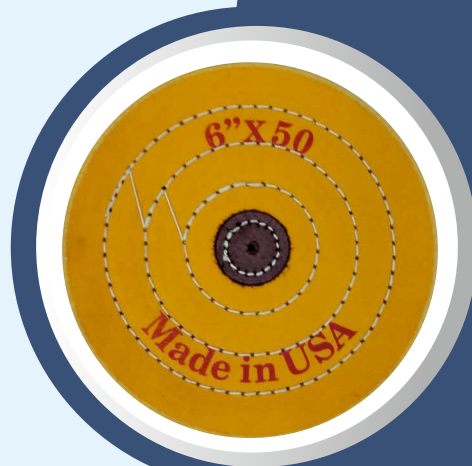

ORANGE MUSLIN BUFF

Has a long-lasting durability and can be combined with a hydrolyzable wax compound or a wax compound for platinum, gold and silver. It can also be used with a higher-grain wax compound to remove scratches on the gold surface.

Reduces polishing time while providing a high-shining finish for all metals.

Used for pre-polishing processes as well as fine polishing.

.....

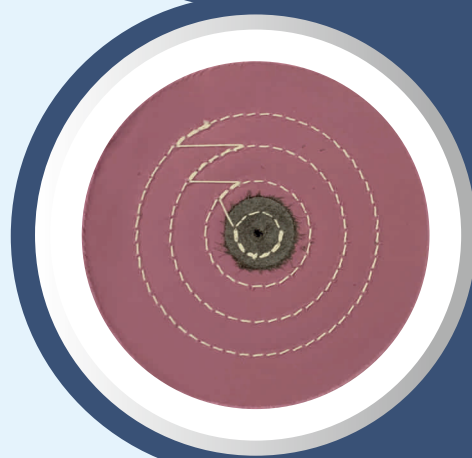

PURPLE MUSLIN BUFF

This buff has availability in fine cutting operation in all metals & specially platinum.

Available size : 6" X 50 Ply.

.....

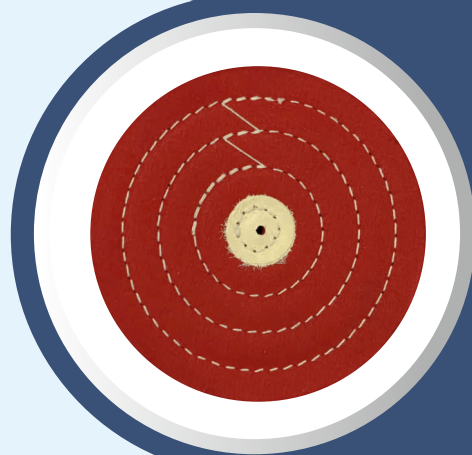

RED MUSLIN BUFF

Has a long-lasting durability and can be combined with a hydrolyzable wax compound or a wax compound for platinum. It can be also be used with a higher-grain wax compound to remove scratches on the gold surface.

Reduces polishing time while providing a high-shining finish for all metals. Used for pre-polishing processes as well as fine polishing.

.....

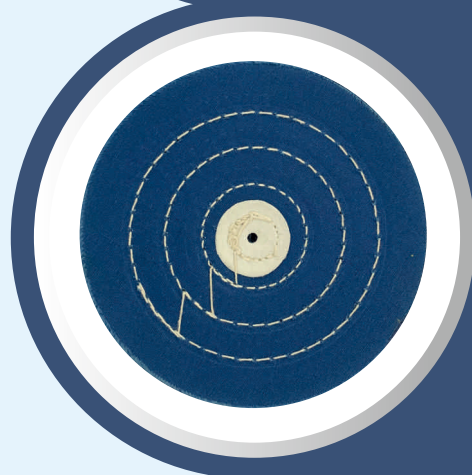

BLUE MUSLIN BUFFS

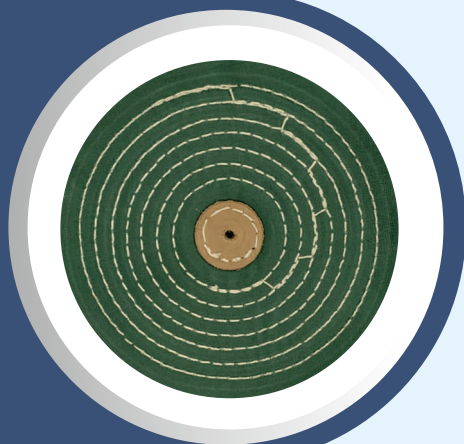

Has a thick fabric, high hardness and high durability. Especially suitable for a scratch removal in platinum, with high-grain wax compound to perfectly flatten the platinum surface.

It is suitable for the pre-polishing process of platinum. After completion, it needs to achieve the mirror polishing effect through the white muslin buff.

Available Size : 6" X 50 Ply.

FELT RING STICK

Made of the highest grade wool felt, mounted to tapered wood mandrel for use on tapered spindle. Ideal for polishing the inside of rings and other hard to get to internal surfaces.

Available Size : 3" With Wood | 3" Without Wood
4" With Wood | 4" Without Wood

LAPPING WHEEL

- **Buff Style** : Split Lap
- **Size** : 6" X 1/2"
- **Available Textures** : Soft | Medium | Hard | Rock Hard
Flint Hard
- These high-quality split and beveled lapping wheels are the standards of excellence in split lap performance. Extra care in the manufacturing of these wheels provides extra-special results in quality polishing and in long-lasting performance. Each wheel is balanced to ensure smooth performance.
- During manufacturing, the felt is steamed to shrink and thicken the fibers, and then it is pressed into a specific hardness.
- All lap wheels have a 1/8" (3.18mm) pin hold and they are 1/2" (13mm) thick and beveled.

KNIFE EDGE IDLI BUFF (FELT WHEEL)

Pure wool felt laps are processed to ensure uniform density and maximum dimensional stability for consistent results and for increased durability.

Available Sizes : 2" | 3" | 4"

POLISHING BRUSHES

WHITE PAISA BRUSH

Lathe Brush | White Bristles
With Aluminium Center
Available Size : 19mm and 25mm

BLACK PAISA BRUSH

Lathe Brush, Black Bristles with aluminium center.
Available Size : 19mm & 25mm | Available in
Medium and Hard.

GREY PAISA BRUSH

Lathe Brush | Mixed Color (Medium)
With Aluminium Center
Available Size : 19mm and 25mm

BROWN PAISA BRUSH

Lathe Brush | Mixed Color (Medium)
With Aluminium Center
Available Size : 19mm and 25mm

BLACK BROWN PAISA BRUSH

Lathe Brush | White Bristles
With Aluminium Center
Available Size : 19mm and 25mm

HARD BRISTLE END BRUSH

THUPI-BLACK

Suitable for cleaning and deep scratch removal. End brushes used for difficult cleaning jobs in tight areas add your favorite polishing material and use with dremmel, flex shaft or standard polishing motor for cleaning or deep scratch removal.

SOFT NYLON BRISTLE END BRUSH

THUPI-WHITE

End Brushes are used for difficult cleaning jobs in tight areas. Directly fit into flexible shaft motors, hand motors, etc. With 2.35mm shank mandrels.

BRASS WIRE BRUSH

Lathe Brush | Brass Wire 0.08mm
With Aluminium Center

STEEL WIRE BRUSH

Lathe Brush | Steel Wire 0.08mm
With Aluminium Center

LUXOR®

POLISHING COMPOUNDS

Get mirror finish, zero roughness,
efficient polishing, shine & productivity on your Jewellery
by using **Luxor High-End Polishing Compound**

A Complete Line Of LUXOR POLISHING COMPOUND (FRANCE) Covering All Polishing Operations : Preparation, Polishing, Finishing, super- Finishing. The Greater Abrasive Power Reduces Working Time, Consumption And Cost. This World Renowned Range Of Luxor Line Is Appreciated For Its Excellent Mirror-finish Final Rendering On Precious Metals.

Each Reference of the Luxor Line enable you to :

- Decrease The Consumption Of Polishing Paste.
- Save A Lot Of Time.
- Obtain Very Clean Pieces.
- Keep Your Work Staons Clean.

Advices of Usage of Luxor Polishing Compound

Color		Grit	Surface	Operation	Application
	Pink	6.5 μ	Any kinds of metal	Preparation (when strong cut is necessary)	Felt & Cotton Buffs for Polishing
	Green	3 μ	Any kinds of metal	Preparation (medium cut for small defaults)	Felt & Cotton Buffs for Polishing
	Grey	1 μ	Platinum	Soft Preparation	Felt & Cotton Buffs for Polishing
	Blue	1 μ	Non-Ferrous (Eg. Brass, Copper)	Fine Polishing	Cotton Buffs for Brightening
	White	0.3 μ	Stainless Steel/Silver/ Platinum Grey-and White Gold	Fine Polishing & Finishing	Cotton Buffs for Brightening
	Yellow	0.5 μ	Yellow-and Pink Gold	Super Finishing	Cotton Buffs for Brightening
	Orange	0.1 μ	Precious and fragile metals Eg. Gold/Silver/Platinum/Steel	Mirror Polish for extremely good brightness	Cotton Buffs for Brightening

DIALUX PREMIUM POLISHING COMPOUNDS

Dialux is the premium polishing compound and a firm favourite for all those looking for a superior finish to their work. Very popular with jewellers and watch makers the world over. The compound is uniformly blended with abrasive grit so only a small amount needs to be applied to a felt, cotton, hair or bristle brush point, bob or wheel. With minimum clean up required you will love these high quality polishing compounds!

- **Dialux Blanc/White** : Silver, White Gold & Plastics. Pre-polish and polish to a high lustre finish
- **Dialux Bleu/Blue** : Steel, stainless steel and Non-precious metals such as copper and brass. Removal of scratches, cleaning and a high lustre finish
- **Dialux Rouge/Red** : Gold & Silver. High mirror finish
- **Dialux Vert/Green** : Platinum, Steel, Chrome & other hard white metals. Final polishing process
- **Dialux Gris/Grey** : Stainless Steel & Platinum. Removal of marks and finishing
- **Dialux Jaune/Yellow** : Non-ferrous metals (eg. Bronze and Tin) & Plastics. Removal of scratches and polish (also works well with gold and silver)
- **Dialux Black** : Silver and Argentium Silver. Mirror finish
- **Dialux Orange** : Steel, stainless steel, all Ferrous metals. Pre-polish

UNITE BRASS INVESTMENT POWDERS

Brasscast Is An Exceptionally Competitive

UNITE BrassCast plaster-bonded investment powder, specifically formulated by optimizing the particle-size distribution and thermal expansion to help casters to compete in the most demanding of environments.

• • • The casting of brass for the costume jewellery market accounts for a large percentage of worldwide jewellery production, and is an area where costs must be minimized. OROSOL BrassCast helps achieve this but at the same time produces castings with excellent surfaces, therefore reducing metal loss and keeping finishing work, prior to plating, to an absolute minimum.

OROSOL BrassCast can also, under strictly adhered to conditions, successfully cast silver, producing good quality castings with smooth surface finish.

UNITE BRASS AND SILVER INVESTMENT POWDER

Quality and Versatile Investment Powder

UNITE BRASS AND SILVER used for many years by the Indian Jewelry Industry. It has been developed for the most exacting requirements of High Definition Brass & Silver castings.

UNITE BRASS AND SILVER is a permeable Investment Powder precisely suitable for vacuum assisted castings.

It is a competitively priced product giving an Excellent Surface finish, Easy Clean off resulting in reduced metal loss and less polishing time.

UNITE SILVER INVESTMENT POWDER

Quality and Premium Investment Powder for silver

• • • UNITE SILVER is a permeable Investment Powder precisely suitable for vacuum assisted castings.

It is a competitively priced product giving an Excellent Surface finish, stronger mould and Easy Clean off resulting in reduced metal loss and less polishing time.
